**Summary of Presentation**

He welcomed all the stake-holders who had come to attend the workshop and mentioned that the main objectives of the EU- Asia Invest Programme was to prepare the Indian Suppliers to meet the requirements of the European Buyers in the face of new emerging legislations. This he said would contribute to increased trade between India and the European Union. He further stressed that the objective of the workshop was not merely to make recommendations of academic interest but to give practical suggestions, which would be of relevance to the Indian manufacturers for continued trade with the EU.
